

Create the Azure resource

<https://docs.microsoft.com/en-us/azure/cognitive-services/speech-service/overview>

To add a Speech service resource (free or paid tier) to your Azure account:

1. Sign in to the [Azure portal](#) using your Microsoft account.
2. Select **Create a resource** at the top left of the portal. If you do not see **Create a resource**, you can always find it by selecting the collapsed menu in the upper left corner of the screen.
3. In the **New** window, type "speech" in the search box and press ENTER.
4. In the search results, select **Speech**.

5. Select **Create**, then:
 - Give a unique name for your new resource. The name helps you distinguish among multiple subscriptions tied to the same service.
 - Choose the Azure subscription that the new resource is associated with to determine how the fees are billed. Here is the introduction for [how to create an Azure subscription](#) in the Azure portal.
 - Choose the [region](#) „westeurope“ to be used. Others has not been tested by Dveloper. Azure is a global cloud platform that is generally available in many regions worldwide, but splitted inot ragions for various reasons.
 - Choose either a free (F0) or paid (S0) pricing tier. For complete information about pricing and usage quotas for each tier, select **View full pricing details** or see [speech services pricing](#). For limits on resources, see [Azure Cognitive Services Limits](#).
 - Create a new resource group for this Speech subscription or assign the subscription to an existing resource group. Resource groups help you keep your various Azure subscriptions organized.

- Select **Create**. This will take you to the deployment overview and display deployment progress messages.

It takes a few moments to deploy your new Speech resource.

Find keys and location/region

To find the keys and location/region of a completed deployment, follow these steps:

1. Sign in to the [Azure portal](#) using your Microsoft account.
2. Select **All resources**, and select the name of your Cognitive Services resource.
3. On the left pane, under **RESOURCE MANAGEMENT**, select **Keys and Endpoint**.

Each subscription has two keys; you can use either key in your application. To copy/paste a key to your code editor or other location, select the copy button next to each key, switch windows to paste the clipboard contents to the desired location.
